Dear Sir or Madam,

Subject: work-experience placement

I am a French student completing a degree in biotechnologies in SUP'BIOTECH, an engineering school in Paris.

My studies imply completing a four months work-placement abroad from 15 February to 5 June 2010 within an organisation dealing with biotechnologies.

Beside the Pharmaceutical and Cosmetic modules I am studying, I am also taking marketing courses as I have a great interest in this field and am seriously considering it as my chosen career path.

My experience in sales and customer relationship management combined with my courses in Pharmacy and Cosmetics have convinced me that Marketing within a Biotechnology environment, is a career option I would like to explore.

My project entails working in a cosmetic/pharmaceutical laboratory but more specifically within the business marketing department in order for me to carry out a comprehensive marketing study for your organisation. This research can be defined with you according to your wants and needs.

This work-experience is intended to provide me with an insight into the Marketing biotechnologies field and what it is really like. It would also allow me to expand the knowledge I possess about business practices relating to biotechnologies.

In addition, I believe that my motivation to excel and my involvement will make me an asset to your marketing department.

I would be delighted to spend this experience in another European state and I am certain this will allow me to learn more about your customs and cultural habits.

I am sure this experience will be enriching for both of us.

Please find my CV enclosed summarising my experience as well as my education and I hope to have the opportunity to discuss it further with you.

Many thanks for taking the time to consider my application.

I remain at your disposal if you require any additional information.

I am looking forward to hearing from you very soon.

Yours sincerely,

Sabri KHATMI
